Pearson BTEC Level 5 Higher National Diploma (HND) in Computing

REGENT
MIDDLE EAST

This course focuses on building up-to-date skills in specialist technical software development and allows students to develop up-to-date knowledge in programming and systems development. During the course, students will learn how to plan, design and implement a range of different software solutions using an array of computing and programming tools used in today's computing field.

Students who successfully complete the course are well equipped to become impactful employees in the computing sector.

For students wishing to continue their studies, they can transfer to a university and participate in a Computing top-up degree in one of over 200 global universities.
